Comprehension

Earth has a lot of mountains. Mountains cover about one fourth of all land. Mountains come in many sizes. Mountains are made of rocks.

Mountains or Alpine habitats change the higher you climb. At the bottom of mountains you might have grasslands and forests. As you move up the mountains, the plants and animals slowly disappear. Animals like mountain goats, birds and snow leopards make their homes in the trees and grasses of mountains. High up, the trees do not grow anymore.

Many of the tallest mountains have ice and snow on top of them for part or all of the year. This snow and ice melts in hotter parts of the year. The water runs downhill to rivers and lakes.

I. Answer the following questions.

Q1. What are the mountains made of?

Q2. What can you find at the bottom of the mountains?

Q3. What do the tallest mountains have on the top of them?

II. Find the opposite of the given words from the passage above.
